

The LOTT Clean Water Alliance implements Mainsaver 12.7 and Mainsaver Connect

San Diego, CA – July 20, 2016: The LOTT Clean Water Alliance has successfully installed and implemented Mainsaver 12.7. In addition to the recent upgrade of the core Mainsaver product, LOTT has enabled the use of Mainsaver Connect to enhance the productivity, mobility and connectivity of its fifty member technical staff.

LOTT a Mainsaver customer since 2000 is taking advantage of its recently upgraded wide area network and plans to implement the new inspection round route capability found in Mainsaver 12.7. Their asset manager is both enthusiastic and optimistic with the ease of use and immediate availability of historic collected data to the operator performing the current round. Rounds are accomplished four times daily throughout the treatment plant. The new software functionality solves a couple of common problems, how to make the collected rounds data immediately available to the person performing the current inspection; elimination of the mountains of paperwork and spreadsheets that historically have been accumulating; and providing an easy way of seeing and interpreting collected data. LOTT will be taking advantage of the new software to re-evaluate work flows that have been in place since the agencies inception in the early 1970's.

About LOTT:

The LOTT Clean Water Alliance owns and operates wastewater and reclaimed water facilities throughout the Lacey-Olympia-Tumwater Washington area and serves some 90,000 homes and commercial/industrial connections.

About Mainsaver:

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
